RAZVAN FLORESCU

Education

2012 - 2016

Bachelor's degree System Engineering

Faculty of Automatic Control and Computers, Universitatea Politehnica Bucharest

august 2013

Web & HTML5

IP WorkShop Summer School

2008 - 2012

High School

Colegiul National "Al. I. Cuza" Ploiesti

WorkExperience

December 2018 - present

Front End Developer

Tremend, Bucharest

Working for Raiffeisen Bank Romania on-site at the client for their new banking web platform (new.raiffeisenonline.ro). Beeing part of a fully functional scrum team, my responsabilities include development new features based on the PO requests, with a focus on UI/UX and cross-platform scalability, fixing bugs and live incidents, unit tests and technical documentation. Used stack: AngularJs, BackBase, Scss, Jasmin/Karma, Jenkins, GitLab, Jira.

August 2017 - January 2018

Full Stack Developer

Fullstack SRL-D, Bucharest

I worked as a full-stack developer on javaScript (AngularJs + NodeJs + MongoDB) for a small start-up, I used technologies as docker, gulp, git, coffeeScript and ecmaScript 6. The application I worked on was a saas, and it was developed on a microservices architecture. I have implemented various features and worked on the entire flow (client - api - database)
Used stack: JavaScript, MongoDB, AngularJs, CoffeeScript, Node.js, HTML/CSS, docker, ES6, microservices, bitbucket, Jira

November 2013 - August 2016

Volunteer Web Developer

Advice Students Romania, Bucharest

I have worked as a volunteer and I have implemented the organization website (advicestudents.ro) on the Wordpress platform, and I have created other small presentation sites for various projects.

February 2017 - December 2018

Web Developer

Dpd UK, Bucharest

My responsibilities include the development of the new components and custom functionalitys that need to be implemented in the client side of the apps used in the DPD depots and hubs for internal processes of the company.
I've worked as a fornt-end developer, using javascript frameworks (AngularJs and ReactJs), but I had the oportunity to implement and fix a few APIs for the back-end (in NodeJs).
Used stack: JavaScript, Angularjs, Node.js, ReactJS, Redux, bitbucket, webstorm, bamboo, JIRA,, MongoDB, HTML/CSS

July 2015 - February 2016

Web Developer

Clarisoft Technologies, Bucharest

Developing web applications and integrating new features as well as maintaining and improving the old ones. I worked with AngularJs, ReactJs, PHP, WordPress, MySQL, HTML, CSS, jQuery, Json, SVN tortoise. I have worked on 4 projects. The largest one was a platform for the configuration and management of computer networks. I have implemented the front-end part in AngularJ / html / css, and the communication with the back-end via APIs. The project lasted about 5 months, and for the most part I worked full-time on this project. Another technology I worked with was ReactJs on a slightly smaller project. Another project involved 3 Wordpress sites to which I added various front-end and back-end elements. The fourth project was a php site where I fixed some front-end bugs and added a booking functionality (it was a travel site).
